

# Action statement

*Flora and Fauna Guarantee Act 1988*

## Austral Sage (*Salvia plebeia*)

Taxon ID: 502995

Action statements are developed under the *Flora and Fauna Guarantee Act 1988* (FFG Act). Their preparation and implementation complement the FFG Act strategy *Protecting Victoria's Environment – Biodiversity 2037* and its vision that “Victoria’s biodiversity is healthy, valued and actively cared for”.

### Species and Distribution

Austral Sage. Image source: Atlas of Living Australia.

Austral Sage Victorian Biodiversity Atlas (VBA) records since 1970. See [NatureKit](#) for an interactive map.

### Conservation Status

#### Critically Endangered

**Listing criteria:** 3.1.2(a)(b)(i)(ii)(iii)(iv)(v); 3.1.3(b)(i)(ii) of the Flora and Fauna Guarantee Regulations 2020.

This means that:

- its geographic distribution is extremely restricted; and
- it is restricted to a limited number of areas that are subject to the same threat or suite of threats that can impact all individuals present; and
- there is a continuing decline or reduction in:
  - its extent of occurrence; and
  - its area of occupancy; and
  - the area, extent or quality of habitat; and
  - the number of locations or subpopulations; and
  - the numbers of mature individuals; and
- the total number of mature individuals is very low, and the number is likely to continue to decline; and
  - each subpopulation is extremely small; and
  - most of the individuals are in one subpopulation.

**Corresponding International Union for the Conservation of Nature (IUCN) criteria:**

B1ab(i,ii,iii,iv,v)+2ab(i,ii,iii,iv,v); C2a(i,ii).

More information on IUCN listing criteria can be found here: [IUCN Red List Criteria](#).**Species Information**

Species information such as its description, distribution, ecology and references are provided in the [Threatened Species Assessment Report](#) and [VicFlora](#).

**Threats**

The threats below have been identified through expert input, published literature and spatial analysis.

Threat	Description
<b>Fire</b>	
Fire management activities	<ul style="list-style-type: none"> <li>Fire management operations such as creation of fuel breaks (soil disturbance, slashing) may remove or degrade habitat, cause mortality of individuals, and reduce regeneration.</li> </ul>
<b>Habitat loss, degradation or modification</b>	
Excess biomass	<ul style="list-style-type: none"> <li>Excess growth of either native or introduced plant species can change the structure and composition of habitat.</li> </ul>
Land use change	<ul style="list-style-type: none"> <li>Land use change alters vegetation extent and condition, and may impact water regimes, contributing to habitat loss and degradation.</li> </ul>
<b>Human disturbance</b>	
Road and track construction or maintenance	<ul style="list-style-type: none"> <li>Construction and maintenance of waterway crossings, roads and tracks expose the species and habitat to disturbance from run-off, soil erosion, siltation, and weed and pathogen introduction, in the immediate area and downstream.</li> </ul>
<b>Introduced species</b>	
Deer	<ul style="list-style-type: none"> <li>Introduced deer species (Sambar Deer (<i>Cervus unicolor</i>), Red Deer (<i>Cervus elaphus</i>) and Fallow Deer (<i>Dama dama</i>)) degrade habitat through herbivory, antler-rubbing, trampling, pugging of wet soils, increasing nutrient loads, erosion of waterway edges, and increasing the accessibility of habitat to other introduced species.</li> </ul>
Feral goats	<ul style="list-style-type: none"> <li>Feral goats (<i>Capra hircus</i>) can cause direct mortality of plants and degrade habitat through herbivory and trampling, and decrease soil stability which contributes to erosion.</li> </ul>
Feral pigs	<ul style="list-style-type: none"> <li>Feral pigs (<i>Sus scrofa</i>) cause direct mortality and damage habitat through pugging and wallowing that compacts soils. Pigs can also cause erosion and increase nutrient loads that result in degraded water quality and changes to vegetation structure.</li> </ul>
Rabbits	<ul style="list-style-type: none"> <li>The European Rabbit (<i>Oryctolagus cuniculus</i>) can cause direct mortality of plants and significantly impact recruitment. Rabbits also damage habitat through the construction of warrens that can cause soil erosion, and provide habitat for other introduced species.</li> </ul>
<b>Native species</b>	
Competition and/or herbivory by other native species	<ul style="list-style-type: none"> <li>Competition for resources with, and/or herbivory by, other native species can impact habitat, recruitment and/or mortality rates. This threat is exacerbated where habitat loss or degradation reduces availability of resources.</li> </ul>

Threat	Description
<b>Population dynamics</b>	
Lack of pollination opportunities	<ul style="list-style-type: none"> <li>Lack of pollination opportunities or events contributes to low recruitment rates.</li> </ul>
Loss of genetic diversity	<ul style="list-style-type: none"> <li>Small, greatly reduced, and/or isolated populations are at increased risk of loss of genetic diversity, which leads to a heightened risk of reduced recruitment and/or increased mortality rates.</li> </ul>

## Conservation Objectives

Conservation objectives are informed by the conservation status and criteria in which the species was listed under the FFG Act. This provides a framework to understand how we can work towards recovery and improve the species' conservation status over time as per the objectives of the FFG Act.

The key objectives of this action statement are:

- Mitigate threats to populations and habitat to increase resilience, increase genetic fitness and minimise future population decline;
- Increase the Austral Sage's range and/or extent, by providing opportunities for natural movement/dispersal;
- Increase knowledge of biology, ecology, distribution, demography, emerging threats, and conservation requirements; and
- Support community participation and improve awareness of the Austral Sage and conservation of its habitat, including the restoration of cultural knowledge where appropriate.

## Conservation Actions

The actions below have been identified through expert input, published literature and spatial analysis. Actions are listed in alphabetical order to allow all interested parties to prioritise based on their context, capacity and capability. Holistic management of the cultural landscape where this species occurs is encouraged noting additional actions including cultural practice may benefit this species. For more information on where to undertake actions that benefit multiple species and identify the most beneficial locations to undertake actions for this species, please refer to [NatureKit](#).

Action	Description
Artificial pollination	<ul style="list-style-type: none"> <li>Mitigate low pollination opportunities by undertaking artificial pollination, to improve recruitment success.</li> </ul>
Avoid and/or mitigate impacts associated with fire management	<ul style="list-style-type: none"> <li>Undertake biodiversity values check prior to fuel management in areas of the species' habitat, to confirm treatment suitability and timing.</li> <li>Ensure that species distribution data and ecological information is available and considered in fire management activities.</li> </ul>
Biomass management	<ul style="list-style-type: none"> <li>Manage biomass as required to enhance habitat structure and composition, using ecologically and culturally appropriate means.</li> </ul>
Collect and store reproductive material	<ul style="list-style-type: none"> <li>Undertake appropriate collection of propagules for long-term storage. Ensure that adequate supply and genetic diversity is secured for future reintroduction, and that essential information (such as dormancy) is known. Also ensure collection of mycorrhizal fungi where appropriate.</li> <li>Maintain seed collections from target populations within the Victorian Conservation Seedbank at the Royal Botanic Gardens Victoria.</li> </ul>
Control deer*	<ul style="list-style-type: none"> <li>Implement and maintain effective control of deer in priority areas.</li> </ul>

Action	Description
Control feral goats*	<ul style="list-style-type: none"> <li>Implement and maintain effective control of feral goats in priority areas.</li> </ul>
Control feral pigs*	<ul style="list-style-type: none"> <li>Implement and maintain effective control of feral pigs in priority areas.</li> </ul>
Control rabbits*	<ul style="list-style-type: none"> <li>Implement and maintain effective control of rabbits in priority areas.</li> </ul>
Establish and maintain fencing	<ul style="list-style-type: none"> <li>Establish and maintain fencing to prevent access and damage to individuals or populations from introduced or native species where required.</li> </ul>
Ex-situ management	<ul style="list-style-type: none"> <li>Establish and maintain ex-situ populations in suitable secure sites, to service the conservation objectives of the species.</li> </ul>
Manage road and track works	<ul style="list-style-type: none"> <li>Protect habitat from disturbances caused by track, bridge and ford construction and maintenance.</li> </ul>
Permanent protection*	<ul style="list-style-type: none"> <li>Investigate incentives, voluntary agreements, covenants, and other permanent protection measures to protect and restore habitat.</li> </ul>
Restoration and/or revegetation*	<ul style="list-style-type: none"> <li>Undertake restoration and/or revegetation to increase habitat suitability and/or create new habitat areas.</li> </ul>
Survey and monitoring	<ul style="list-style-type: none"> <li>Undertake targeted field surveys to confirm the extent of all known populations and seek to discover previously undetected populations based on predicted habitat and ecological information.</li> <li>Monitor representative populations to determine trends and management needs.</li> </ul>
Translocation	<ul style="list-style-type: none"> <li>Design and implement a translocation program to meet the objectives of the action statement.</li> </ul>

*\*Indicates landscape-scale actions that may deliver benefits to multiple species*

## Past Actions

The key conservation management actions listed below have been delivered in the past 10 years.

Past Action	Description
Maintain and manage seed collection and storage	<ul style="list-style-type: none"> <li>Seed stored in the Victorian Conservation Seedbank, Royal Botanic Gardens Victoria.</li> </ul>

## Decision Support Tools

Decision making for conservation actions is supported through the following Victorian Government tools which may be of assistance in choosing the most appropriate or beneficial actions for biodiversity:

- [Choosing actions for nature](#)
- [Biodiversity Knowledge Framework](#)

## Further Information

- [Austral Sage Species Forecast Report](#)
- [Threatened Species Assessment Report - Austral Sage \(\*Salvia plebeia\*\)](#)
- [Victorian Deer Control Strategy](#)
- [Victoria's changing climate - understanding the impacts of climate change in Victoria](#)
- [Commonwealth Threat Abatement Plans](#)
- [Flora and Fauna Guarantee Regulations 2020](#)
- [IUCN criteria summary](#)

## Get Involved and Take Action

If you are interested in supporting this species' recovery, there are some important things to consider.

The Department of Energy, Environment and Climate Action (DEECA) is committed to engaging and partnering with Traditional Owners on how they wish to be involved in the planning and implementation of actions for this species. Steps must be taken to avoid harm and where appropriate ensure actions can deliver cultural benefits.

You can find advice about required approvals, land manager and/or owner permissions, options and incentives for private land conservation, and engagement with Traditional Owners and public land managers here: [Action statements \(environment.vic.gov.au\)](#)

To identify the relevant Traditional Owners, use the [Aboriginal Cultural Heritage Register and Information System \(ACHRIS\) Welcome to Country and Acknowledgements Map](#).

You can also register your interest in taking action so we can connect you to other people or organisations working to help us secure the future for this species at [threatened.species@deeca.vic.gov.au](mailto:threatened.species@deeca.vic.gov.au)

## Reporting Actions

Activity data are critical to monitoring the implementation and progress of actions and evaluating action statements. These data are also used to:

- determine progress towards achieving the contributing targets for [Protecting Victoria's Environment – Biodiversity 2037](#).
- inform the five-yearly State of the Environment Report.

For guidance on reporting actions undertaken on this species, refer to [Activity Data](#).

## Submitting Monitoring Data

The Victorian Biodiversity Atlas (VBA) provides a foundational dataset showing where biodiversity occurs across the Victorian landscape and how it may have changed over time. As a core input for decision support tools that inform conservation action, public land management, research activities and reporting, we encourage all participants in the delivery of on-ground actions to submit species records and observations, including for weeds or introduced animals, as they carry out their projects.

For further information see: [Victorian Biodiversity Atlas \(environment.vic.gov.au\)](#)

Sign up and begin submitting your data today at: <https://vba.biodiversity.vic.gov.au/>

## Indigenous Data Sovereignty

DEECA is committed to recognising and enabling Indigenous Data Sovereignty (IDS). Indigenous data comprise any information or knowledge of species and Country collected or recorded by, or about, Traditional Owners. IDS asserts Traditional Owner rights to access and have governance over the collection, ownership and use of their data, including that which is included or referred to in this Action Statement.

### Acknowledgement

We acknowledge and respect Victorian Traditional Owners as the original custodians of Victoria's land and waters, their unique ability to care for Country and deep spiritual connection to it. We honour Elders past and present whose knowledge and wisdom has ensured the continuation of culture and traditional practices.

We are committed to genuinely partner, and meaningfully engage, with Victoria's Traditional Owners and Aboriginal communities to support the protection of Country, the maintenance of spiritual and cultural practices and their broader aspirations in the 21st century and beyond.
